CAPABILITY STATEMENT

# ModGov

SECURITY & TECHNOLOGY CONTRACTING

## Complex requirements. Clear delivery.

Cybersecurity, governance, and technical advisory for public agencies and commercial organizations. Founder-led engagements built around defined scope, practical deliverables, and evidence you can use.

### CORE CAPABILITIES

01

#### Security Modeling & Architecture

System and data-flow modeling, architecture reviews, and risk scenarios that connect technical decisions to operational priorities.

System models · Architecture findings · Prioritized risk registers

02

#### Governance & Planning

Current-state assessments, cybersecurity plan development, policy review, and practical improvement roadmaps.

Cybersecurity plans · Policy reviews · Remediation roadmaps

03

#### Assurance & Remediation Support

Control assessment, evidence organization, and remediation tracking to support accountable decisions and follow-through.

Control and evidence crosswalks · Findings registers · Action tracking

04

#### Research & Training

Focused technical research, facilitated workshops, and role-specific learning for security and business stakeholders.

Research briefs · Technical workshops · Role-specific training
